Outreach for Summer Food Service Programs

Dear parents, students and community members,

As your educational services partner, we value our continued relationship to help build a stronger community and a better future for all of us.

One critical area that can clearly effect our children's education is their proper nutrition. It is even more challenging for many families during the summer months when their children are at home. That's why the Michigan Department of Education (MDE) has created many food service initiatives to help meet these needs.

There are a number of summer programs out there for students to utilize. The easiest way to find these programs is to visit MDE's link to the Summer Food Services Site.

The link can be found below or by visiting the MDE School Nutrition Program site, under Program Information, then look under Summer Food Service Program.

http://www.michigan.gov/mde/0,4615,7-140-43092_34491---,00.html

The available site maps are updated regularly so make sure to check the web site for the latest news and locations on this wonderful program.

Feel free to contact us or MDE if you have any further questions.

Thank you!
